Staff engineer with a passion for building products, good design, & mentoring others.

Work

Staff Engineer
Mailchimp, 2014 - Present

Impacted several teams through work on core products & platforms in parallel with progressive personal growth. Led creation & adoption of new design system. Pioneered code review philosophy. Integral member of frontend modernization efforts. SME for legacy stack, AB Testing, & feature gating. Advocated for accessibility, CI/CD, user research, responsive design, rapid prototyping, content strategy, on-call, & pragmatic engineering practices. Shared expertise through healthy feedback, office hours, Tech Talks, & mentoring newer engineers.

Web Developer
Florida State University, 2010 - 2014

Multifaceted position responsible for creation & management of web services for the College of Communication & Information. Hosted & managed a network of WordPress sites. Planned & implemented large IA changes, redesigns, & adoption of responsive design principles.
